

What happens when a mother-daughter team combine the beauty of buttercups, the power of storytelling and a great respect of nature to create a wonderful book with amazing art? In a beautiful field, the buttercups grow, but when two children have no respect for nature garbage begins to pile up high. Are the days of the buttercups over, or will help come to rescue the buttercups from a fate more deadly than illness? See the difference that children can make when they set their mind to it and decide to take care of Mother Earth.

Beautifully written by Shelley Meyer and vividly illustrated by her daughter Tessa Meyer, this inspiring and powerful story will find a spot on every child's list of favourites, especially when they can carry the story forward in their own lives and plant their very own buttercups. This wonderful title is doubly special because for every book - 1 tree has been planted.
